

Clinical Tenure/Tenure-Track Position in Tuberculosis

The National Institute of Allergy and Infectious Diseases (NIAID), Division of Intramural Research (DIR), is seeking an outstanding tenure/tenure-track investigator to work in the area of clinical tuberculosis.

This clinical tenure/tenure-track investigator will be expected to implement and direct a leading research program that can include, but is not limited to, the diagnosis, management, drug treatment, immunology, or complications of tuberculosis. The investigator will be expected to conduct a vigorous research program that includes inpatient and outpatient responsibilities to be conducted at the NIH Clinical Center, at international sites, or both. Involvement in human studies of tuberculosis patients is essential.

For tenure-track applicants, an outstanding postdoctoral record of research accomplishment is required. For tenure and tenure-track applicants, an M.D., M.D./Ph.D., or equivalent degree and board eligibility/board certification in pediatrics or internal medicine is required. Tuberculosis specialization through infectious diseases, immunology, or pulmonary medicine is highly desirable. The incumbent will be expected to meet the requirements for authorization of patient care privileges by the Credentialing Services of the NIH Clinical Center.

The incumbent will be expected to devote at least 20 percent of his or her time to direct patient-related activities.

The investigator will be assigned independent resources to include clinical and/or laboratory support personnel, equipment, space, and an allocated annual budget for services, supplies, and salaries sufficient to foster success. This is a tenure/tenure-track appointment under Title 42. Salary is dependent on experience and qualifications.

Interested candidates may contact Dr. Karyl Barron, Deputy Director, DIR, NIAID, at 301-402-2208 or kbaron@nih.gov for additional information about the position.

To apply:

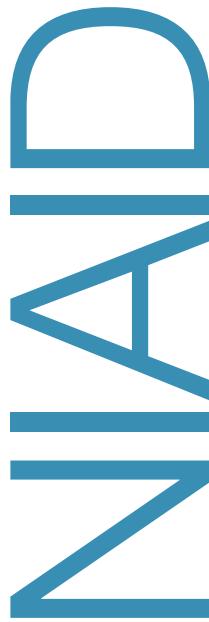

E-mail curriculum vitae, bibliography, and a two- to three-page description of your proposed research program to Ms. Bao-Hanh Ngo at

TBsearch@niaid.nih.gov by

September 14, 2010. In addition,

three letters of recommendation must be sent directly from the referees to Dr. Karyl Barron, Chair, NIAID DIR TB Clinical Tenure/Tenure-Track Search Committee, c/o Ms. Bao-Hanh Ngo at TBsearch@niaid.nih.gov or 10 Center Drive, MSC 1356, Building 10, Room 4A30, Bethesda, MD 20892-1356. E-mail is preferred. The selected candidate may be asked for additional references.

Further information about DIR laboratories is available at www.niaid.nih.gov/about/organization/dir/default.htm, and information on working at NIAID is available on our Web site at www.niaid.nih.gov/careers/tb.
